Revenue, Net Profit, ROE and ROCE trend

Balance sheet composition and latest cash-flow waterfall

Pros	Cons
Revenue growing at above 15% CAGR over 5 years reflects strong business momentum	Debt-to-equity ratio of 12.14 is elevated for a non-financial company and warrants monitoring
Operating profit margin above 25% indicates strong pricing power and cost discipline	Operating margins declining for 3 consecutive years suggest pricing or cost pressure
Net profit compounding at above 20% over 5 years creates significant shareholder value	Return on capital employed below 10% suggests the business is not generating sufficient returns on invested capital
Earnings per share growing above 15% CAGR indicates strong earnings quality and compounding	Net debt exceeding 3 times EBITDA is a high leverage ratio and limits financial flexibility

Capital Allocation: Growth Funded by Debt
