Sector: Financial Services | **Sub-sector:** Financial Services

SIMULATED: stock_prices and market_cap datasets are simulated where used for valuation or price context.

Incorporated in 1986, Indian Railway Finance Corporation borrows funds from the financial markets to finance the acquisition / creation of assets which are then leased out to the Indian Railways as finance lease

Revenue, Net Profit, ROE and ROCE trend

Balance sheet composition and latest cash-flow waterfall

Pros	Cons
Revenue growing at above 15% CAGR over 5 years reflects strong business momentum	Debt-to-equity ratio of 8.38 is elevated for a non-financial company and warrants monitoring
Operating profit margin above 25% indicates strong pricing power and cost discipline	Interest coverage ratio below 1.5x indicates the company is at risk of not meeting its debt obligations
Net profit compounding at above 20% over 5 years creates significant shareholder value	Return on capital employed below 10% suggests the business is not generating sufficient returns on invested capital
Consistent dividend yield above 2% backed by positive free cash flow	Net debt exceeding 3 times EBITDA is a high leverage ratio and limits financial flexibility

Capital Allocation: Shareholder Returns
